

Press information – **raumplus** presents the double-leaf Swing Door Slim Line

## RAUMPLUS PROVIDES CREATIVE INSPIRATION

The new double-leaf »Swing Door Slim Line« for large wall openings from raumplus is a huge success in every sense of the word. It fulfils its function in such a brilliantly aesthetic, practical, and customized way that it has already won the German Design Award 2020 in the category »Excellent Product Design – Buildings and Elements«.

The door, opened and closed using a handle, is now also available with an additional handleless leaf that opens up new possibilities for large openings. This second leaf can either be fixed in position at the top and bottom or used in tandem with the actual swing door, providing generous access to rooms. The twin-element raumplus system is highly versatile and thus perfect for many different functions – from a large-format room door; to access to offices, doctor's offices, event or conference rooms through a stylish divider for bathrooms, saunas, or spa areas. Whatever its purpose, the »Swing Door Slim Line« delivers maximum flexibility and visual lightness.

In combination with panels in clear or tinted safety glass, its delicate black anodized aluminum frame makes for a transparent look, allowing large volumes of light to penetrate into rooms. Alternatively, it can be fitted with solid panels in a wood look, on-trend paint colors, or modern décors for greater privacy. Optional glued-on horizontal and vertical rails provide additional options for individual structuring of doors.

The Frankfurt-based German Design Council's jury of experts agreed unanimously that all of the above are qualities that make for a »winner«, adding the German Design Award 2020 in the category »Excellent Product Design – Buildings and Element« to the existing series of **raumplus** design awards. It's now official – the double-leaf »Swing Door Slim Line« is a source of creative inspiration for interiors with large wall openings.

Should you publish this article we would be grateful if you could name **raumplus** as the manufacturer.
